DESIGNED IN DENMARK - PRODUCED IN EU

Congratulations on Your New Chair!

Your chair has been designed with your comfort in mind and comes with two helpful features:

- Adjustable backrest – lock the backrest securely at any angle you like.
- Built-in seat lift – Makes it easier to sit down and get up from your chair.

Find the Right MASTER Setting for You

To give you the best comfort, the chair's mechanism can be adjusted to suit your weight.

There are three settings to choose from:

Assembly A: Red – Light 50–70 kg

Assembly B: Green – Normal 70–90 kg (factory set)

Assembly C: Yellow – Heavy 90–120 kg

How to Adjust Your Chair

If another setting is better suited to your weight, you can easily change it by following these steps:

1. Release the seat lift.
2. Sit down on the chair.
3. Raise the seat approximately 5 cm.
4. Adjust the setting on both sides of the chair to the desired position, as shown in the illustration.

Notice: Remember to set both sides to the same colour to ensure that the mechanism is adjusted correctly.

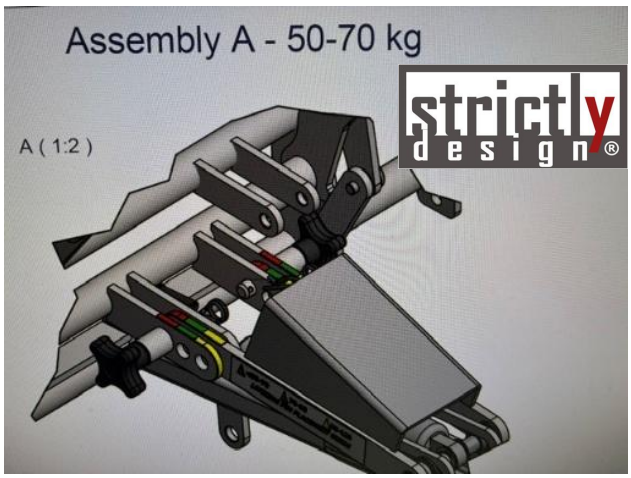

That's it!

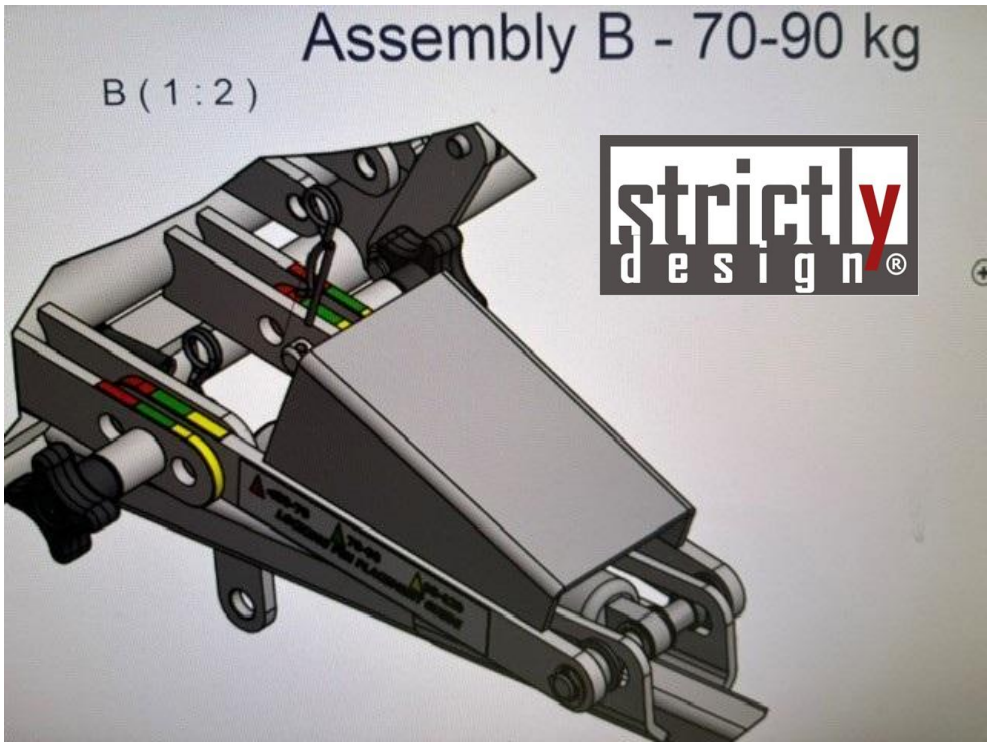

We hope your new chair gives you many comfortable hours of sitting.

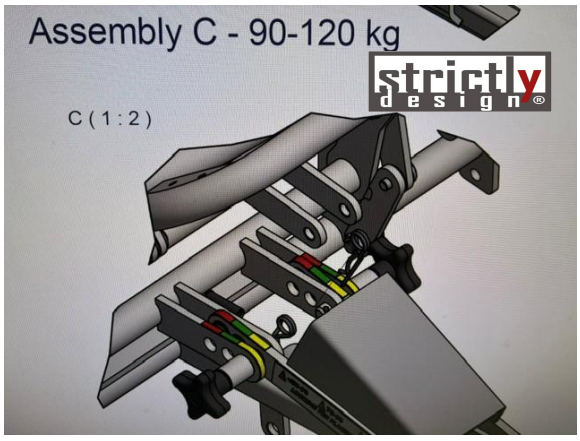

Enjoy!
